

# Landscape on whitened data: two discrete sources ( $d = 2, N = 10,000$ )

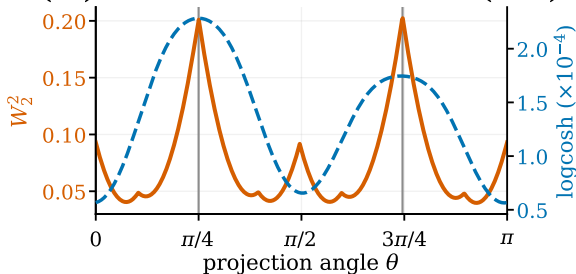

(I) More non-Gaussian Poisson ( $\lambda = 0.5$ )

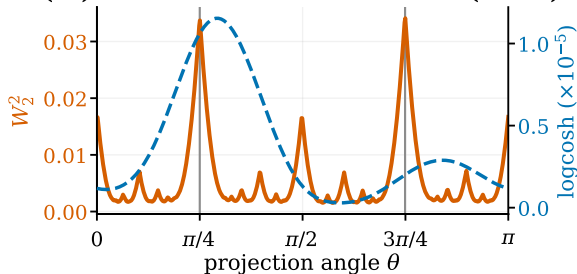

(II) Less non-Gaussian Poisson ( $\lambda = 3.0$ )

(III) More non-Gaussian Binomial ( $n = 2$ )

(IV) Less non-Gaussian Binomial ( $n = 10$ )

—  $W_2^2$     - - -  $\logcosh$     — true discrete direction    ..... Gaussian direction
