

Discrete Mixture Optimization Landscape: OT-ICA vs. FastICA ($d = 2, N = 10,000$)

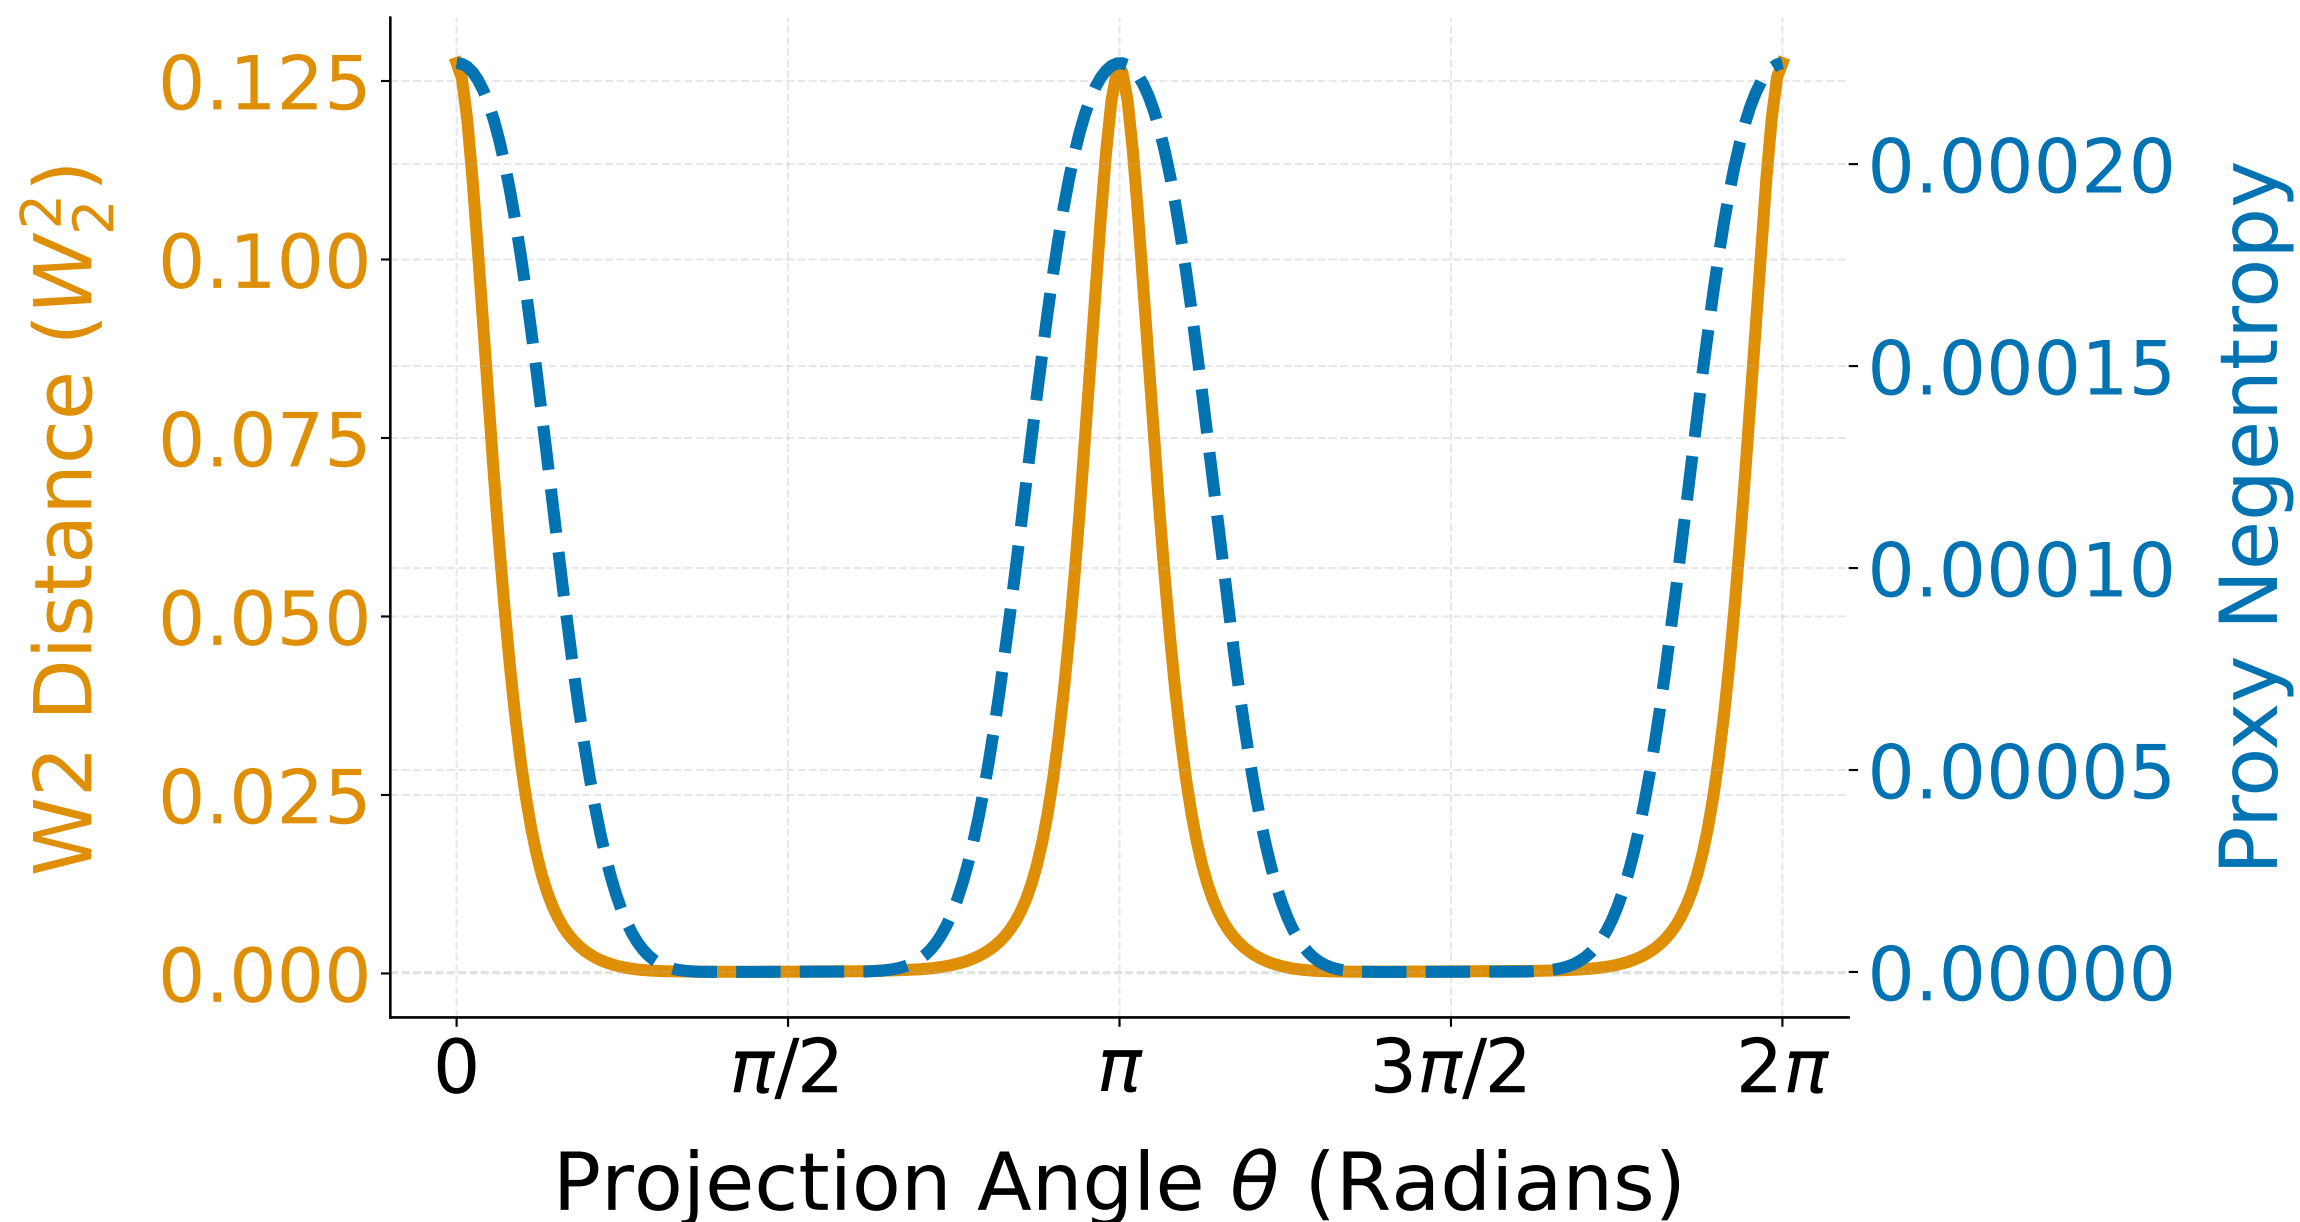

(I) More Non-Gaussian Poisson
($\lambda = 0.5$): $\lambda = 0.5$

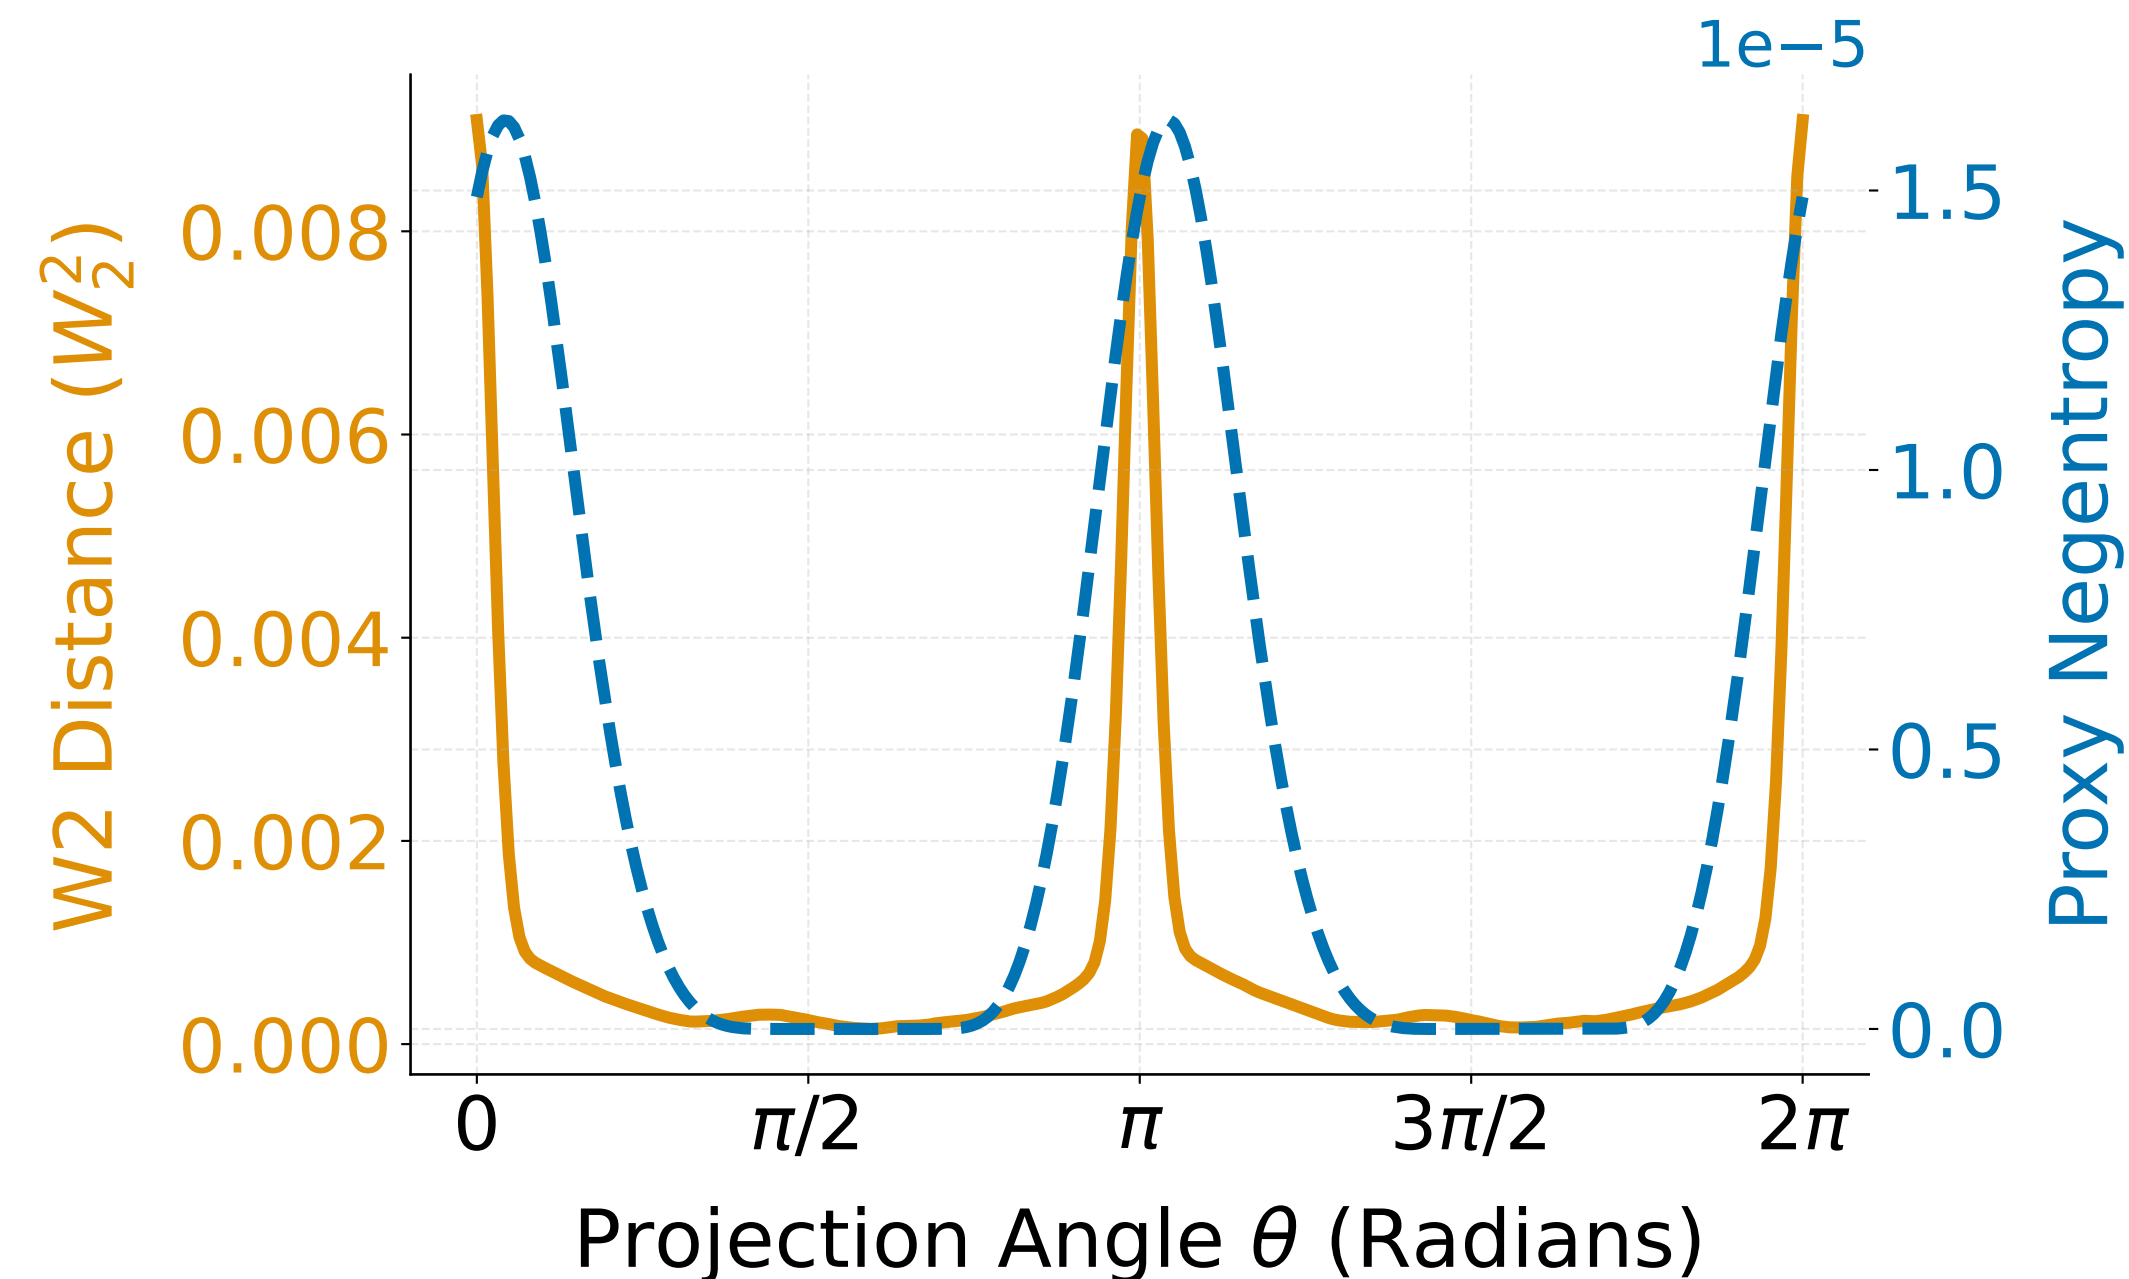

(II) Less Non-Gaussian Poisson
($\lambda = 3.0$): $\lambda = 3.0$

(III) More Non-Gaussian Binomial
($n = 2$): $n = 2$

(IV) Less Non-Gaussian Binomial
($n = 10$): $n = 10$

— OT-ICA (W_2^2 Distance) - - - FastICA (Logcosh Negentropy)
